English language certificate .

Admission is based on an application.

Master's Programme

THE MASTER IN INNOVATION, HUMAN DEVELOPMENT AND SUSTAINABILITY

stems from a partnership between the University of Geneva and organizations from International Geneva in the framework of the implementation of the Sustainable Development Goals (SDG). This highly multidisciplinary Master's degree aims to train students to analyze problems and identify innovative solutions in terms of the governance of sustainability. The Master's degree comprises a high proportion of practical courses (project workshops), but also fundamental courses on sustainable development in all its dimensions (social, economic, and environmental). This Master's degree was created in partnership with Tsinghua University (Beijing), and students have the possibility of linking two complementary programs, one in Geneva and the other in Beijing (minimum 1 year each time), and earning both diplomas after two and a half years of study. It is also possible to complete this program alone; in this case, students are required to spend one semester in one of the partner universities (Tsinghua, Dakar, Bogotá, Exeter, Baku, etc.).

THREE AVAILABLE SPECIALISATION MODULES:

- Sustainable Human Development
- Standards, Governance and Sustainability
- Future cities and regions

www.unige.ch/sciences-societe/formations/masters/innovation-human-development-and-sustainability

STUDY PROGRAMME
